2021 Parts Catalog

Dear Customer,

First we want to sincerely thank you for taking the time to pick up this catalog and look through it. We are extremely excited to finally have a print catalog to be able to give our customers as a reference to keep around their farms. Hopefully you will find this catalog useful and informative for whatever farming operation you are in. We strive to serve our customers with the best products at the best possible prices at all times; however, we do reserve the right to change any pricing in this catalog at any time.

Company History

Zeiset Equipment LLC was founded in 1988 by Marvin Zeiset. This beginning was just a continuation of a family legacy. Marvin was born into a family of progressive innovators in the poultry industry dating back to the late 1800s. His great-grandfather was the first person in Juniata County, Pennsylvania, to hatch eggs with a homemade incubator. Marvin's grandfather saw a need for an improved poultry nest, and in 1952 he made and patented a colony style nest, which was marketed under the name The Favorite Nest. Favorite Manufacturing Company continued to expand their line of products, first to a roll-away style nest, then to poultry cage systems. By the late 1970s, Favorite Mfg. Co. was a major supplier of poultry equipment nationwide as well as internationally.

Marvin began working for Favorite Mfg. Co. in 1975, and in 1979 he began working in their research and development department. As a part of Favorite Equipment's research and development team, he gained first-hand experience at meeting the needs of the poultry industry. This served him well in the years to come. He continued working for Favorite Mfg. until they sold the company to Big Dutchman in 1982. At that point Marvin chose to leave the company, and went to work for a local equipment distributor as a service technician.

In 1988, after doing poultry equipment service and maintenance for several years, Marvin decided to start a new venture that would provide equipment service and repairs for local poultry producers. This step marked the beginning of what is today Zeiset Equipment LLC. With God's blessing, we continue to grow and provide housing and equipment solutions for the poultry industry.

As the years passed, we continued to expand our operations. We became a licensed Val-Co dealer in 1996, Jansen Poultry Equipment in 2000,

Big Dutchman in 2006, and L.B. White in 2012. Today, we offer many other supporting products to the agricultural industry.

The year of 2013 brought many changes to Zeiset Equipment. There was a request from our vendors to expand our operations to better serve the Delmarva region. Ownership carefully weighed the option, and after much consideration and prayer, opened a new business in Marydel, Delaware. The new company, Marydel Ag Supply LLC., opened its doors for business May 14, 2014. In addition to a complete line of poultry equipment and supplies, Marydel also has a full line hardware store that adds a valuable link to the local community.

By 2018, we had outgrown our facilities in Manheim, PA and were in need of more warehouse space. Instead of expanding the existing warehouse, we decided to look for options in central PA to diversify our operations. In the spring of 2019, we reached a tentative merger agreement with Central Penn Ag Services LLC, and a property was purchased along Route 522 in Beaver Springs, PA. On August 10, 2020 Zeiset Equipment in Beaver Springs officially opened its doors for business. Much like Marydel Ag Supply, Beaver Springs carries a full line of hardware and building materials to complement the line of agricultural supplies.

In early 2020, during preparations for the opening of the Beaver Springs location, we again received requests from vendors and poultry integrators to expand operations. This time the request was to open a location in Virginia/West Virginia area. With everything else happening within the company this was a very tough decision. After many meetings, discussions, and prayerful consideration, a shop in Moorefield, West Virginia was rented, and the doors officially opened on December 15, 2020.

As we continue to grow and expand our facilities, staff, and product line, our desire is to continue to offer quality products with courteous service and knowledgeable advice. We desire that every customer feels like they are treated fairly and respectfully. We continue to look to the future with innovative solutions to today's agricultural challenges, and look forward to continuing to serve you in the years to come.

Thank you for being a valuable customer!

Sincerely,

From all of us at Zeiset Equipment LLC

Galvanized Bins

Proudly made in the USA!

VAL-CO® Bulk Storage Bins are the ideal structure to protect feed from weather. The weather-tight die-formed roof has reinforcing ribs at the seams for added strength and ease of assembly. The 22" diameter, warp-resistant top lid closes tight to keep out moisture. Bin bolts have a built-in weather seal, and a drip edge keeps water away from the taper hopper and unloading boot. VAL-CO bins are tough! Bin sheets are made of heavy gauge G-90 galvanized steel with 22½" wide by ½" deep corrugation. Legs are die-formed with a sturdy bracing system for structural support. High strength bolts are used throughout VAL-CO bins.

From 116 to 2,149 bushels ...

We have the right bin size to meet your needs!

Poly Bins

Maximize your profitability through proper feed storage

FEATURES

- Visible feed level
- Corrosion resistant for long life
- Large poly bins have 60 degree cone & ultra smooth interior
- Finish for easy, even feed flow.
- Large poly bins have 35 degree roof for maximizing fill height
- Easy to assemble
- Strong enough to handle concentrate material
- Heavy-duty steel ring and support stand
- Large 22" fill opening
- Ideal strength and flow characteristics for high moisture feeds, corn, soybean, salt, concentrates (premix), etc.
- Remote lid opener with double spring hold down.
- Poly auger boot for multiple size straight augers 2" - 4".
- Roller slide gate constructed in heavy-gauge steel, auger boots will fit under gate
- Cyclone for proper receiving of pneumatically delivered feed.
- Pneumatic fill pipe to attach to the cyclone and bin stand
- Sturdy steel ladders for all bin sizes

Weigh Bin Scales

The #1 choice in the poultry industry

FEATURES

- Full capacity beam
- Compatible with all feeder/fill systems
- Easy to install
- Designed for 6' bin
- **7' bin adapter available**
- Multiple Sizes:
 - 2.3k lb. Bin Scale
 - 5k lb. Bin Scale
 - 2.3k/5k lb. Combo Chart Bin Scale
 - 10k lb. Bin Scale

ITEM NO.	DESCRIPTION	PRICE
BLBS5000	5,000 lb. Mechanical Bin Scale	2,874.52
BLBS10000	10,000 lb. Mechanical Bin Scales	3,197.87

BinTrac Bin Scales

Accurate and reliable feed bin scale

STORES AND DISPLAYS

- Current inventory by bin
- 24-hour feed use for past 4 days
- Last 4 feed delivery weights for each bin

FEATURES

- Easy installation on existing and loaded bins using patented load cell bracket assembly
- One-year warranty covers lightning damage to load cells – extended warranty available
- The bracket does the lifting
- No field calibration required
- Temperature compensated

Augers

Flex Auger Systems

220 Auger System

Used to convey dry ground feed and crumble type mash – maximum moisture content 18%. Maximum particle size $\frac{1}{8}$ " diameter x $\frac{1}{2}$ " long. System is not recommended for large pellets or shelled corn. PVC tubes are 2.25" (55 mm) outside diameter; flexible auger is 1.52" outside diameter. Approximate feed delivery rate is 15 lbs. per minute or 900 lbs. per hour based on 40 lbs. per cubic foot feed density and 358 RPM drive unit.

300 Auger System

Used to convey dry ground feed and crumble type mash – maximum moisture content 18%. Maximum particle size $\frac{1}{8}$ " diameter x $\frac{1}{2}$ " long. System is recommended for pellets or shelled corn. PVC tubes are 3" (75 mm) outside diameter; flexible auger is 2.25" outside diameter. Approximate feed delivery rate is 35 lbs. per minute or 2100 lbs. per hour based on 40 lbs. per cubic foot feed density and 358 RPM drive unit.

350 Auger System

Used to convey dry ground feed and crumble type mash – maximum moisture content 18%. Maximum particle size $\frac{3}{16}$ " diameter x $\frac{1}{2}$ " long. System is not recommended for large pellets or shelled corn. PVC tubes are $3\frac{1}{2}$ " (90 mm) outside diameter; flexible auger is 2.71" outside diameter. Approximate feed delivery rate is 100 lbs. per minute or 6000 lbs. per hour based on 40 lbs. per cubic foot feed density and 358 RPM drive unit.

420 Auger System

Used to convey dry ground feed and crumble type mash. Maximum particle size $\frac{3}{16}$ " diameter x $\frac{1}{2}$ " long. Steel tubes are 4.25" (108 mm) outside diameter; flexible auger is 3.55" outside diameter. Approximate feed delivery rate is 220 lbs. per minute or 13,200 lbs. per hour based on 40 lbs./cubic foot feed density and 359 RPM drive unit.

SYSTEM NOTES

- Size your system to make the maximum operating time four hours per day. Some applications may require two flexible auger fill systems or even a 4" or 6" rigid auger system to meet the desired feed delivery rate.
- A time clock or other control is recommended with all systems to prevent excess empty auger operation and other malfunctions.
- Multiple bin pass-thru options or tandem systems are recommended when extra feed storage or dual rations are required.

Auger Flighting

All auger flighting is sold by the foot.

Pan Feeding

Big Dutchman Broiler Pan Feed System

Big Dutchman

FLUXX Feed Pan

The broiler pan that set the standards for increased feeding space

The patent pending FLUXX broiler pan feeding system continues to set the standard in broiler feeding technology. The FLUXX system has been farm tested around the world, showing it to be the best at faster starts and bigger birds. Now with new features and better performance, Big Dutchman continues to deliver the innovation you need to keep your broiler operation on top!

IMPORTANT ADVANTAGES

- Available in standard or deep dish design
- Pan spins 360 degrees providing even feed distribution
- Up to 16 feed stations encourages birds to eat straight into the pan
- Internal lip is designed for easy feed access, less waste and injury
- Feed levels are easily set with 'Spin n' Lock' adjustment
- Swinging pan design for easy cleaning and less injury
- Snap on top cap for easy installation and service
- Additional dish latch to ensure dish stays secured
- Will last for years with heavy-duty plastic construction

FUZE[®] Feeders from VAL-CO[®]

Performance You Can Count On

Val-Co Broiler Pan Feed System

The FUZE ProLine pan feeding system regularly outperforms other poultry feeders in feed trials. Its 6 pan/grill combinations let you choose the one that is best suited for your application. The FUZE floods evenly for easy bird access to feed, swings open for quick cleaning, and is made of a stronger, lighter plastic to make poultry feeding a snap.

FUZE PROLINE FEEDING SYSTEMS FEATURES

- Three large feed windows for automatic and even pan flooding with feed
- Grill and pan form a large feed saving lip to minimize feed spillage and waste
- Accurate feed level adjustments are quickly made from outside the pan
- Deep center feeding "V" bottom nestles down into the litter to promote easier chick access when brooding and overall feed savings
- Increased material thickness added to the pans in the "scratch" areas to improve pan life
- Anti-rake fins reduce billing and feed wastage
- Constructed with engineered polymer resins to resist wear and reduce the harboring of bacteria
- Two-piece top for ease of installation/replacement or one-piece tower for additional rigidity and strength
- A pan/grill hinge and lock that securely locks pan to grill and provides for easy cleaning between flocks
- A mechanical switch control pan which provides high reliability and ease of maintenance

FUZE Feed Pan

FEATURES & BENEFITS

- 6 pan/grill combinations to find the perfect fit for your flock
- 3 large feed windows evenly flood the pan to give birds equal access to feed from all sides
- Increased material thickness prevents cracking
- Polymer resin material is a dream to clean – just snap the pan open and hose it off!

Val-Co Turkey Pan Feed System

The PTF Turkey Pan Feeder is a multi-adjustable feeder that is easy to handle and gives excellent results. The ample and deep poly pan offers sufficient space for the growing turkeys, avoids feed waste and can easily be removed, exchanged or cleaned.

FEATURES

- Self-leveling which allows feeder to swing, therefore reducing bruising
- Steel feed level tube can be adjusted in seconds
- Even feed distribution
- Extra strength construction designed to withstand the movements of full-grown turkeys

Big Dutchman Turkey Pan Feed System

UniGROW360 Turkey Starter Feed Pan

Start poults quickly and move them out sooner!

The innovative, patented Big Dutchman UniGROW 360 starter feed pan for turkeys provides quick starts, the ability to move birds out at an earlier age, more feed in the pan without waste, and easy access to feed. UniGROW 360 pans flood in a full 360° circumference, and feed flows easily without bridging, so all birds can easily access feed.

IMPORTANT ADVANTAGES

- The durable top cap snaps onto the pan assembly for easy installation and maintenance
- Unique three-strut grill makes it easier for small birds to get to the feed without being trapped
- Feed collar is raised or lowered with the winch system and keeps birds from slinging feed
- Integral anti-scratch ring prevents feed from being scratched from the pan
- Multiple minimum feed level settings allow you to custom-set pans
- Unique shut-off feature allows you to shut off feed flow to individual pans
- Pan disperses feed in a 360° circumference, preventing staleness and waste of feed
- Easy to thoroughly wash down

Gladiator Turkey Feed Pan

The 'tough as nails' adult turkey feeding pan

The Gladiator adult turkey feeding pan is engineered to stand up against the daily rigors of feeding the most aggressive and heavy turkeys. From flock to flock, the Gladiator pan is made to take a beating, and designed for ease of maintenance and adaptability.

IMPORTANT ADVANTAGES

- Snap on cap provides easy assembly and maintenance
- Pans can be quickly removed individually for maintenance
- Swinging pan design minimizes bruising while maximizing meat quality
- Snap'n lock mechanism locks the dish securely to the grill to eliminate dish drop
- Dish unlocks and is removed for easy and thorough cleaning between flocks
- Feed savings lip design reduces feed waste, resulting in better feed conversions
- Feed levels can be easily adjusted with twist and lock feature
- Large windows allow for easy access to feed
- Fill and auger system delivers an accurate and uniform feed level to the entire flock

TurboMates

Quantity Pricing Available

Chick Start Pan

The TurboMate is a chick feeder designed to use for the first 14 days. It provides easy access to feed while minimizing waste

Place between automatic feeders and replace your other floor feeding systems

- Fits both ribbed and smooth feed tube types
- Recommend one TurboMate for every 75-100 chicks
- When finished, close off feed and rotate up 180 degrees for storage
- On smooth feed tubes, install the TurboMates in alternating directions to counterbalance the weight.
- On ribbed feed tubes, install an adjustable feeder hanger every 30 feet of feed tube to offset any tilting of feed line
- 8.5" tall from bottom of feed tube to bottom of pan

This version is not compatible with taller feeders such as the Chore-Time Revolution and the Big Dutchman Fluxx feeder.

High Chick Start Pan

The TurboMate 1 Long Version is a chick feeder designed for taller feeders such as the Chore-Time Revolution and the Big Dutchman Fluxx feeder. Like the regular TurboMate, it is designed to use for the first 14 days. It provides easy access to feed while minimizing waste

Place between automatic feeders and replace your other floor feeding systems

- Fits both ribbed and smooth feed tube types
- Recommend one TurboMate for every 75-100 chicks
- When finished, close off feed and rotate up 180 degrees in either direction for storage
- 9.63" tall from bottom of feed tube to bottom of pan
- 2.65 lb. feed capacity

ITEM NO.	DESCRIPTION	PRICE
FDTMCSP	Chick Start Pan	6.16

Big Dutchman Chain Feed System

The proven Champion Chain feeding system improves production and profits.

Flexible, efficient and productive, the Champion Chain feeding system provides superior feed flow in an easy-to-install, low-maintenance, and durable package. The Champion Chain is based on the original design that set the standards for maximized feed conversions, reliability, and durability. In fact, enough Champion Chain has been sold to wrap around the planet nearly four times!

IMPORTANT ADVANTAGES

- Fast, uniform feed distribution yielding uniform nutrition and bird size, with less stress and migration
- Provides approximately 43% more feeding space than drag auger feeders, and allows birds to eat from both sides of the trough
- Reduces competition for feed with a large-capacity trough
- Reduces feed waste with an internal remix wheel
- Regulates the amount of feed coming from the hopper, keeping a consistent supply of feed on the chain
- Available for pullets and breeder hens

Big Dutchman.

Feed Corner

Big Dutchman chain feeder corner assembly with suspension hanger

- Replacement parts available including wheel and wear points
- Removable cover for easy access to check chain
- Corner post is accessible for oiling of the corner wheel

Maintenance Tips for Chain Feeders

- Make sure your chain is properly tightened. Add or remove links as needed.
- Lubricate the center post in corner units every 60 days.
- Inspect drive hopper unit V-belts for excess wear regularly.
- Check & maintain a proper oil level in gearbox every 6 months. Change oil every 12 months.
- Keep feed lines level & square at all times to reduce excess wear. Check trough connections if needed.
- Be sure to remove all broken shear pins from system.

Hog Feeding

SDI

Nursery Feeders

Multiple sizes and configurations available

SDI's Nursery Feeders are great for introducing weaned piglets to dry feed.

FEATURES

- Built tough - constructed of 20-gauge and heavier stainless steel
- Welded for durable, long-lasting use
- Multiple holes and knockouts simplifies installation in various application
- Roll-hemmed & folded edges - to avoid sharp points and provide superior strength
- EZ-Squeeze Adjustment System - "farmers favorite" - easy function with precise feed flow settings

Finisher Feeders

Other sizes and configurations available

SDI's Finish Feeder – recognized for outstanding quality and performance, precision, and low maintenance!

FEATURES

- Built tough – constructed of 18-gauge and heavier stainless steel
- Welded for durable, long-lasting use
- Multiple holes and knockouts – simplifies installation in various applications
- Roll-hemmed & folded edges – to avoid sharp points and provide superior strength
- EZ-Squeeze Adjustment System – “farmers favorite” – easy function with precise feed flow settings.

Brower Pig Feeders

These feeders are constructed of heavy 20-gauge galvanized steel for years of service. They are equipped with an adjustable feed gate at the trough, which provides for a fast feed flow. It also has a 1" wide feed saver lip. This model of feeder is designed for 4-week-old piglets to sows. Top covers raise from the back for easy, convenient filling without disturbing the hogs. Heavy, weather-tight trough lids keep the feed dry and keeps pests out of the feed.

ITEM NO.	DESCRIPTION	PRICE
BE-11H	Brower 1 Door Pig Feeder 1.5 BU.	98.75
BE-22H	Brower 2 Door Pig Feeder 3.7 BU.	146.12

Feed Drop

FEATURES

- Quickly read feed level and delivery settings through the translucent body with calibration marks
- Easily adjust individual rations and delivery settings with the durable side handle
- The built-in cable retainers maintain cable alignment while roller pulleys reduce resistance to extend the cable life of the pull cord
- Easily install even on existing auger lines

ITEM NO.	DESCRIPTION	PRICE
HGFDSVD10C	Sow 10 lb. Feed Volume Drop Control	289.03
HGFDSVD10	Sow 10 lb. Feed Volume Drop	25.90

Community Nests

Jansen Nesting System

The Jansen Poultry Equipment laying nest is a high quality nest, manufactured of first-class shuttering plywood. The nest is designed to fulfill the natural needs of the hens by creating comfortable surroundings. The open structure of the nest mats ensures clean eggs. Eggs roll onto the egg belt with a precise rolling speed and short rolling distance. This preserves the quality of the egg. The nest provides hens a comfortable and hygienic environment in which to lay their eggs, even with high bird density and high temperatures. Combined with the correct management, floor eggs are kept to a minimum.

**Looking for a complete system?
Contact one of our salesmen
for a quote!**

ADVANTAGES

- Nest materials allow for easy cleaning and disinfection.
- The nest is made of first-class film faced plywood.
- Cleaner eggs, less cracks, less downgrades
- Special soft JPE nest mat, supported by a wire mesh bottom. Dirt falls through small holes in the open nest mats.
- Roof lids can be opened for easy inspection and cleaning.
- Perforated egg belt with round holes
- Patented expel system gently moves the hens out of the nest

Maintenance Tips for Community Nests

DAILY

- Regularly inspect the nest for dirt build-up and damage. Check for and remove dead birds regularly.
- Bent expel grates must be repaired as soon as possible.

WEEKLY

- Empty & clean the dirt drawer, situated under the collection table.
- Check to make sure the nest mats are positioned correctly. The eggs must roll easily onto the egg belt.
- Check the nest mats for dirt.
- Check the egg belt return roller for dirt build-up, clean it, and remove dirt and feathers.

MONTHLY

- Lubricate rod conveyor chains with silicone spray.
- The pulleys of the brush which cleans the belt must be cleaned to prevent slippage.
- Check egg belts and nest mats. Beware that the nest mat material may attract rodents.
- Replace worn out egg belt, chains, sprockets, and other parts as soon as possible.

NXB Nests

Single hole laying nest designed for the next breed of breeder hens

The NXB is a single hole laying nest designed with both productivity and compatibility in mind. Produced for the next breed of breeder hens, this system features complete coverage for the eggs, removable sections for ease of use, and various optional additions to maximize your system's abilities.

IMPORTANT ADVANTAGES

- Single hole laying nest with 10, 9 or 8 nest holes per section side (length of a section is 8' or 2,438 mm)
- Plastic or woven belts are available
- Full nest width egg shields
- Complete coverage of the egg belt keeps eggs hidden
- Nest floor and the substructure below the egg belt consists of corrosion-proof zinc aluminum coated wire grate
- Nest bottom is covered with a perforated nest insert which is easy to install, or taken out for easy cleaning
- Removable sheet metal covers allow the producer easy access to the egg belt for inspection
- Centrally activated closure rods can be lowered at night to prevent hens from sleeping in the nest and aid in keeping the nests clean
- Central suspension system can be winched for servicing between batches

NXB EggTrax Drive

EggTrax – Reinforced egg belt drive for smooth transfer of eggs

The EggTrax egg handling system is used to transfer broiler breeder eggs from the longitudinal egg belt to the cross belt. The system ensures a simple, safe and smooth transfer of eggs for maximum quality control. Adjustable wire threads and anti-crack fingers are just a few of the advantageous features of this proven system.

IMPORTANT ADVANTAGES

- Tension adjustable wire threads (optional) ensure a smooth transfer of the eggs while simultaneously allowing feathers, dust, and eggs without shell to fall down between the threads
- Anti-crack fingers provide a light pressure on the eggs, ensuring a controlled transfer to the cross belt
- An integrated egg belt brush cleans the belts
- Transfer of the eggs onto a rod or steep conveyor is optional
- The unit can be removed single-handedly, facilitating cleaning with a high-pressure cleaner
- Standard conveying speed 13.1 ft. per minute
- Drive width 6.95", 13.78", 19.69"

NXB EggSort Collection Table

EggSort - Table drives for gentle egg collection

Ideally suited for manual collection of eggs, EggSort collection tables ensure maximum smoothness during egg collection because there are virtually no transfer points. Eggs are transferred from the nests and out of the breeder barn on woven or plastic egg belts. In the service room the eggs are then gathered on the collector tables for manual packing. They are available in either center or side belt designs depending on the needs of the house.

IMPORTANT ADVANTAGES

- Durable, galvanized, heavy-duty construction
- Large, adjustable egg shelf
- Variable speed front mounted control with reverse and emergency stop
- Plastic or woven belts
- Reliable 3 phase motors
- Adjustable feet
- Pre-wired
- Egg belt cleaning brush
- 21 foot per minute belt speed
- Easy access to controls
- Removable, magnetic table pads

Val-Co Nests

Val-Co's side belt automated nest has hinged closeout lids to restrict access and unique anti-roost guard with folded edges. Steep roof design reduces dirt and debris build-up.

Ventilated partitions allow fresh airflow. Molded plastic bottoms are contoured to fit the natural shape of the hen and are available with turf or finger pads.

Nest pad not included and must be bought separately.

Packers

Sanovo Packers Parts

Call for pricing on all Sanovo products unless listed otherwise.

Hatchery Packer

The hatchery packer not only takes care of maintaining high hatchability by its careful treatment of the hatching eggs, but also of a considerable saving in labor.

The hatchery packers are robust and built in an ergonomic design, made from non-corrosive material, and can be used in a flexible way. By its integrated setter tray denester, the hatchery packer can also be placed in a small room.

The hatchery packer has a capacity of 24,000 eggs/hour on a 30-egg tray. Depending on the type of setter tray, capacities go from 20,000 eggs per hour for a straight 10 x 15 model up till 24,000 / 28,000 eggs per hour for staggered models. Stainless steel combined with hygienic design

FEATURES

- Near to no maintenance required
- Highest point down setting percentage: >99.8%
- Most gentle egg handling due to special rollers
- Highest finish and safety level

FarmPacker 24000

FarmPacker 24000 is built tough with a soft spot for eggs!

Providing you with reliability and ease of mind, without worrying about maintenance and down time. The packers just keep working.

Designed with your farm environment in mind. Simple, robust, reliable and flexible. Maximum up-time, 100% correct packing, easy to maintain, all day – every day is the key to optimizing your business.

FEATURES

- Stainless steel combined with hygienic design
- Near to no maintenance required
- Highest point-setting percentage: >99,8%
- Most gentle egg handling due to special rollers
- Highest finish and safety level

Most hatchery packer parts interchange with the 24000

ITEM NO.	DESCRIPTION
SKS-890076	Suction Tube Assembly

FarmPacker 100

The FarmPackers, what you see is what you get.

Successful design is more than just shapes and great lines. It's also about sensing that the equipment is exactly right. A dynamic, robust design, with the smallest footprint, made to pack eggs in the most natural way – straight line, point down!

Thanks to their outstanding performance, proven robustness, low energy consumption and easy maintenance, the Farmpackers are your best choice day in and day out. This is why the Farmpackers are found in all corners of the world.

Every FarmPacker is created with the guiding principle that they should be easy to use, so you can focus on getting your eggs packed and spend less time figuring out how to maintain, determine replacement parts

and worrying about up time. If you've never owned a FarmPacker, chances are you will know it inside and out in no time.

The Farmpackers are designed with your farm environment in mind. Simple, robust, reliable and flexible. Maximum up-time –100% correct packing – easy to maintain.

36,000 eggs/hour (100 cases/hour)

Poultry Watering

VAL-CO® now manufactures a more complete line of drinkers!

Added options allow you to select the drinker that best fits your needs. Each drinker provides fresh, clean water.

FEATURES INCLUDE

- Locking Saddle – helps keep the drinker securely in place; allows for optional use of cups.
- Wide Variety of Drinkers – multiple choices, no wrong answers.
- Folding or Flexible Standpipes – to prevent breakage when raising water lines.
- Improved Extra High Flow Regulator – for more water flow.
- Regulator Intake – for even easier line flushing.

WTVR201	Cage Regulator	38.95

Slope Regulator

- Designed for use in barns with downward sloping lines.
- Comes with 24" flex standpipe
- 4-6" maximum slope per regulator
- Use only when column height of end assembly is 6" or higher than that of the supply regulator

ITEM NO.	DESCRIPTION	PRICE
WTVSR	Slope Regulator	24.19

Maintenance Tips for Val-Co Watering Systems

- Your Val-Co watering system should be cleaned every 4 months (or every month in warmer weather) during production.
- It should also be cleaned between every flock. You may use a stronger solution since no birds will be drinking any water. It is vital to thoroughly flush the lines with plain water to prevent storing high levels of cleaning solutions in the lines until the next flock arrives.
- Don't know which cleaning agent to use? Call and one of our parts salesmen will help you choose the one that best fits your needs!

WTVQ150HPFA	Quencher PFA Nipple (Gray Pin)	50 ml/min.	42 ml/min.	0.81

Roaster Nipples

The Roasters are all machined on CNC or Swiss Screw Machines out of a harder stainless steel material than the Quencher models. The Roasters have a bigger trigger pin that resists wear and holds 300% more water than the broiler drinker.

ITEM NO.	DESCRIPTION	FLOW RATE (at 24")		PRICE
		Vertical Action	Side Action	
WTVR150PFA	PFA Roaster Nipple (Yellow Pin)	61.5 ml/min.	34.3 ml/min.	1.18
WTVR150PFAL	PFA Low Flow Roaster Nipple (Gray Pin)	48 ml/min.	32 ml/min.	1.14
WTVR150PFAT	PFA Threaded Roaster Nipple	---	---	1.65

Duck Nipple

The Duck Drinker is made of premium stainless steel material. The high-flow drinker has higher flow rates to meet the specific needs of waterfowl breeds.

Riser Tubes

Rigid, flex, or folding standpipes allow you to choose the best for your farm.

All standpipes now come with the TruSeal™ Standpipe Cap! The TruSeal is able to "breathe" air, but not leak water. The new cap can inhale or exhale the required amount of air as the pressure in the drinker line changes, but seals against water when the drinker lines are flushed, helping prevent messy water spills.

DOSATRON®

DM11F – 11 GPM

Water-Powered
Medicator

e128

Electric Medicator

ETATRON

Dilution™
SOLUTIONS
A Dosatron International, Inc. Company

THE PERFECT SOLUTION!

For both your Medicating and Water Treatment Applications

Medicators

e128

A true 11 GPM electric medicator - the Etatron e128 Mediator is the perfect answer for both your medicating and water treatment needs. This electric pump's operation is NOT affected by water quality and is simple to use, highly reliable, and compact in size.

E128 PUMP FEATURES

- Fixed at 1:128
- Shutdown control if suction or discharge interruption
- One piece diaphragm
- No squeeze tubes
- Superior diaphragm technology
- Not affected by water quality
- Automatically compensates injection for variations in flow
- Self priming, the pump head is equipped with a manual air bleed for fast priming
- PVDF solenoid head for enhanced chemical resistance
- Plugs into a standard 120V outlet
- Works with 1 pulse per gallon or 1 pulse per 10 gallon water meters

SPECS

- Flow - 0.26 GPH (1 LPH)
- Max Pressure - 145 PSI (10 BAR)
- Stroke Output (ML) - 0.09 at 145 PSI (10 BAR)
- Max Pulses Per Min. - 180
- Mount Type - Wall Mount
- Voltage - 120V

eMP

A safe and adequate water supply is fundamental to the production of healthy animals, making a water treatment plan essential. The Etatron eMP pump is the perfect answer for your water treatment, it is simple to use, highly reliable, and compact in size. Automatically adjusts injection speed to the water flow for proportional delivery.

EMP PUMP FEATURES

- Dual scale dial for easy stroke adjustment
- Operates with 1 pulse per 1 gallon or 1 pulse per 10 gallon water meter
- Superior diaphragm technology
- No squeeze tubes that can break
- PVDF solenoid head for enhanced chemical resistance
- IP65 acid resistance housing
- Self priming, the pump head is equipped with a manual air bleed for fast priming
- Turns off automatically when the chemical container is empty
- Pump will turn OFF if pressure exceeds 145 PSI

SPECS

- Flow - 0.26 GPH (1 LPH)
- Max Pressure - 145 PSI (10 BAR)
- Stroke Output (ML) - 0.09 at 145 PSI (10 BAR)
- Max Pulses Per Min. - 180
- Mount Type - Wall Mount
- Voltage - 120V

PKX FT/A

The PKX dosing pump is compact and can be wall-mounted or foot-mounted. The PKX Series solenoid metering pumps are simple to use, highly reliable, and provide compact dimensions. The FT/A is an analog metering pump with manual flow control from 0 to 100%. It has two operating modes controlled by a reed switch water meter:

Volumetric Proportional Mode – 1:1 (1 injection per 1 signal) as indicated by F Mode

Volumetric Timer Mode – 0 to 60 seconds of metering per signal as indicated by T Mode

PKX PUMP FEATURES

- Manual air bleed pump head for fast priming
- Max 120 impulses per minute
- 6.5 ft. suction height
- 120 or 230 V - 50/60 Hz
- Long lasting unique one piece PTFE diaphragm design
- Includes both wall or foot mounting options
- Flashing LED to indicate pump is working
- Compact design
- Adjustable from 0 to 100%
- IP65 acid resistant housing
- Polypropylene housing Pump Head: PP (Polypropylene)
- Diaphragm: PTFE (Teflon®)
- Seals: FPM (Viton®) or EPDM (Dutral®)
- Valves Duck Bill: FPM (Viton®) or EPDM (Dutral®)
- Discharge Tubing: PE (Polyethylene)
- Suction Tubing: PVC

Gator 8001

GATOR-XL- 8001 Built To Last... GATOR-DONE!

The Gator-XL is the worldwide choice for proportionally adding any solution into a water system for livestock, agriculture, horticulture, sanitation, water treatment, etc.

FEATURES

- Water powered
- Competitively priced!
- Designed for simple, low-cost maintenance.
- Able to handle a wide variety of chemicals.
- Made of heavy-duty, modular construction, with a separate water motor and chemical pump section, so the motor stays chemical free, and parts are easy to access for service.
- Easily installed into the piping system with flexible hoses or can be installed directly into the piping system with the optional union connectors.

ITEM NO.	DESCRIPTION	PRICE

AquaBlend

Precision Injection for Agricultural Medication

The AquaBlend injector was specifically engineered to accurately medicate and/or treat water in most agricultural environments. AquaBlend is offered in two different fixed and variable ratio models, and it is designed to handle both liquid chemicals and wettable powders.

FEATURES

- Quick and easy installation
- Perfect for wettable powders and liquid chemicals
- Unique tool-free maintenance

PERFECT FOR

- Vaccinating
- Medicating
- Water treatment
- Cleaning water lines
- Administering nutrients and supplements

Chemilizer

Consistent, Fluid Driven, Chemical Injection

Chemilizer is an industry-leading chemical injector that utilizes years of proven diaphragm technology. Powered by the existing water supply, the internal motor drives the chemical pump, injecting very precise amounts of chemical. The speed of the water motor and pump is proportional to the water flow, ensuring Chemilizer will inject consistent amounts of chemical regardless of fluctuation in water pressure and flow.

FEATURES

- No water filtration required; the diaphragm water motor is unaffected by sand or minerals in the water
- Unique by-pass chemical injection design; the chemical is injected after the motor, avoiding chemical contact with critical motor parts
- Excellent low-flow capabilities
- Corrosion resistant construction – Silicone and Viton components available to withstand the most aggressive chemicals
- Easy and low-cost maintenance – typical maintenance is tool-free
- Now featuring brass inserts molded into the body of Chemilizer, which allow for shorter repair times – the screws no longer require nuts

DM11F

See The Hydraulic Motor Difference

The Dosatron® Diaphragm Injector DM11F is for low flow use. This Dosatron® Medicator uses a newly designed hydraulic motor that is piston-free and has a highly chemical resistant housing making it resistant to most chemicals.

APPLICATIONS

- Medicating
- Sanitizing
- Chlorinating
- Vaccinating
- Water Treatments
- Supplements

FEATURES / SPECIFICATIONS

- Flow Rate: 0.09 to 7 GPM
- Injection Rate: 1:128
- Operating Pressure: 7 to 70 PSI
- Connections: 3/4" NPT
- Size: 13" x 6.25"

INCLUDES

- Mounting Bracket
- Suction Tube
- Strainer
- Weight
- Instruction Manual

D14MZ2

Precise, simple and reliable

Installed directly in the water supply line, the DOSATRON operates by using water pressure as the power source. The water activates the DOSATRON, which takes up the required percentage of concentrate.

Inside the DOSATRON, the concentrate is mixed with the water. The water pressure forces the solution downstream. The dose of concentrate will be directly proportional to the volume of water entering the DOSATRON, regardless of variations in flow or pressure which may occur in the main line.

ADVANTAGES OF A DOSATRON D14MZ2

- High flow rate
- Fewer parts
- Chemical resistant housing
- Easy to read ratio selector

SPECS

- Connection: 3/4" NPT
- Flow rate: 0.05 to 14 GPM (0.19 to 50 LPM)
- Dimensions: 19 1/8" x 6 5/16"
- Percentage Range: 0.2 to 2%
- Oz. per gallon range: 0.256 to 2.560
- Pressure: 4.3 to 85 PSI
- Ratio Range: 1:500 to 1:50

Jumbo Water Filter

Rugged Construction

Filter housings are made of rugged, glass-reinforced polypropylene with brass reinforced gauge port so they won't chip, rust or dent.

Low Cost

Watts Jumbo filters are an economical alternative to costly stainless steel filtration equipment.

Applications

Watts® Jumbo Cartridges are ideal for a wide range of applications, including:

- Whole house filtration
- Commercial filtration
- Industrial filtration
- Pre-filtration for reverse osmosis equipment
- Community water systems
- Sea water applications due to their non-corrosive construction
- Ideal replacement for bag filters
- A convenient alternative to multiple cartridge filters
- Water for livestock and poultry
- Conserves water!
- Watts Big Bubba Cartridge Filter Systems are 100% efficient because no backwashing is required. Valuable water is conserved with no waste.

String-Wound Filters

APPLICATIONS

- Poultry House Filter
- Whole House Water Filter Systems
- Reverse Osmosis Systems
- Drinking Water Filtration

FEATURES

- Reduces waterborne contaminants
- Polypropylene fibers for purity and chemical compatibility
- High quality polypropylene filter media
- High reduction of sand silt rust dirt and scale particles

Well Pump

Shallow well jet pumps are single-stage domestic water pumps designed for pumping potable water in applications where the water is located less than 25 ft. vertically from the pump. A pressure switch is a standard feature. The shallow well pump can be mounted to either a pre-charged, conventional type or free-standing pressure tank.

CONNECTION SIZE: 1½ in Suction
¾ in Discharge

CONNECTION TYPE: NPT

FLOW RATE: 420 gph

FREQUENCY RATING: 60 Hz

H P RATING: 05 hp

INCLUDES: 30 to 50 psi Pre-Set Pressure Switch

MATERIAL: Iron

MAXIMUM HEAD: 25 ft

MOTOR TYPE: Dual Voltage

NUMBER OF STAGES: 1

PRESSURE RATING: 50 psi

SUITABLE FOR: 0 to 25 ft. Depth Shallow Wells

VOLTAGE RATING: 120/240 V

ITEM NO.	DESCRIPTION	PRICE
WTWPT8	8.5 Gal. Shallow Well Pump & Tank	435.98

PWP Solenoids

APPLICATIONS

PWP series direct acting solenoid valve automatically opens and shuts to control the fluid flowing through the pipe. This valve is designed to allow maximum flow rate in a low-pressure pipeline system.

FEATURES

- Direct acting feature allows the valve to open without pressure
- High-quality rubber diaphragm creates a tight seal
- IP65 rated

SPECIFICATIONS

- Working pressure: 0-20 bar (110 or 24 VAC coil)
- Max pressure-resisting: 16bar
- Applicable fluid: compressed air, water, gas, etc.
- Viscosity of the fluid: below 20cst
- Fluid temperature: 80 C(NBR) 130 C(FKM)
- Voltage variation allowed: 10%
- Coil protection level: Ip65
- Recommended installation position: horizontal and the coil should face upward

Tube Heaters

L.B. White Tube Heaters

L.B. White's Sentinel maximizes the radiant heat energy to where it is needed most: to the birds, with minimal waste to convection.

The Sentinel shares the same quality design standards that have earned L.B. White its reputation as the leader in poultry forced air heating and radiant heating. The Sentinel provides the rugged durability to stand up to years of safe, reliable use in harsh confinement environments. And all Sentinels meet or exceed ANSI and CSA standards for safety.

FEATURES

- Hinged burner box lid for easy service access
- Spark ignition for better reliability and longer life than HSI
- Large diagnostic and stage lights on bottom of unit create visibility from entire house
- Pressurized burner technology delivers more even heat over the length of the heater

Big Foot U-Tube Heater

- 19° optimized reflector angle reduces convective wash
- Better radiant throw for even temperature distribution
- Low clearances to combustibles above
- Allows birds warm access to food & water
- Unique u-bend reflector improves heat throw from end of tube
- Rectangular pattern conforms to shape of poultry house
- 4" diameter tubes create a large radiant surface to emit more heat over a wide area
- Each unit comes with fresh air intake kit, exhaust hood, stainless steel flexible gas connector and a pre-wired electrical connection
- Each unit is pre-assembled for easy installation
- Includes TISS™ (tube integrity safety system) - space-ray's patented, innovative safety system. In the unlikely event of a tube failure, TISS has been designed to automatically shut off the heater, providing greater safety and peace of mind.

Tube Heater Maintenance Tips

BEFORE EACH USE

- Check to ensure the surrounding area is free of debris and combustible materials.
- Inspect regulators to ensure the vents are not blocked. Insects, snow, ice, and other debris can cause excess pressure at the regulator.
- Check hoses and tubes for cracks, cuts, or Make sure reflector supports are properly placed and secure.
- Check the heater itself for damaged components, bolts or screws, or nicked or cut electrical leads, etc.

Brooders

Space Ray Brooders

FEATURES

- Heating capacity of 30,000 BTU/hr
- Main burner head made of solid brass for added strength
- Maintenance friendly stainless steel "Wind-Buster" pilot system for flame stability and dependable ignition
- Stainless steel main burner gas line for strength and durability
- Easy leveling low profile mounting bracket
- Meets or exceeds the combustion levels required in CSA standard
- 46" Aluminum canopy as a standard for superior reflectivity

Single Jet Brooder

- No electric required
- S.I.T. modulating control
- 46" Aluminum canopy
- Call for multiple control options

Radiant Brooders

FEATURES

- 40,000 BTU model provides fuel efficient, radiant gas heat for a variety of poultry applications
- Built with heavy-duty corrosion resistant materials to resist corrosion from humidity and ammonia
- DSI models have an integral dual fuel regulator to easily convert between gas types with just an orifice to change
- Stainless steel, easy-to-clean burner

HTBSR40GS - PILOT IGNITION

- No electricity required
- S.I.T. modulating control
- 35" Aluminum canopy

HTBSR40AD - DSI

- DSI control
- Requires 24 volt power supply
- 35" Aluminum canopy

Call for multiple control options.

L.B. White Infraconic Brooders

FEATURES

- Larger, more consistent comfort zone
- Healthier lying patterns that minimize piling
- Better rates of gain
- Lower mortality
- Lower feed and medical costs
- Range of heat outputs and configurations
- Easy to install, easy to move, easy to maintain
- Safe, reliable performance

L.B. White Infraconic Brooder Parts

Heat Mats

Kane Heat Mats are designed for a large variety of uses: from hog farrowing crates, to dog kennels, and whelping boxes, and even for your favorite reptile!

- Provides a large heated area for baby pigs to rest and sleep
- Works as a draft barrier on wire flooring
- Traction designed, non-slip surface
- Easy to clean, durable polyethylene construction
- Double mats have a recess for pen divider
- 80% more efficient than heat lamps
- 115/230 VAC
- Without a controller, the heat mat will operate at 37° F. above ambient temperature

ITEM NO.	DESCRIPTION	PRICE
HTEMKD2736	27" x 36" Double Heat Mat	140.94
HTEMKD2748	27" x 48" Double Heat Mat	166.72

Rheostat

- Low setting puts mat at 20-22° F. above ambient temperature
- Rheostat plugs into 110V outlet
- Heat mat plugs into the bottom of the rheostat
- 300 watt

ITEM NO.	DESCRIPTION	PRICE
HTMR	Rheostat	21.93

Wire Pulling Lubricant

The Klein Tools foam wire pulling lubricant means no drips, stains or messes. Applies easily using an included dispensing tube, even upwards into a vertical conduit with little or no mess. One aerosol can is the equivalent of 1 gal. or 4 qt. of typical gel or wax lubricant (based on job site pulls with foam in 1/4 in. conduit when used as directed).

FEATURES

- 4-times greater yield than gels or waxes
- Coats better and is 30% more slippery than gel or wax lubricants
- No mess formula stays where it is applied and wipes clean from hands and fabric
- Dispensing guide on the can label
- Dispensing tube included
- 19 oz. aerosol can

Fixtures

Dusk to Dawn Light

36-watt LED dusk to dawn light with 5200 delivered lumens.

5000K, gray cULus

FEATURES

- **Housing:** Gray, die-cast aluminum
- **Lens Assembly:** UV-stabilized acrylic prismatic refractor
- **Mounting:** Direct mounting hardware included
Mounts directly or with mounting arm (*Sold separately as an accessory*)
Mounts to pole diameter 1 1/8" - 1 3/4"
Pendant mount with adapter (*Sold separately as an accessory*)
cULus Listed: Wet locations

BENEFITS

- Comes standard with a photocell
- An industry leading 144 lumens per watt

RECOMMENDED USE

- Security
- Area Lighting
- Service Roads
- General Area Lighting
- Yard and Dock Lighting

Arm Mounting Kit

120-277 Volt NEMA Photocell
Field installed. IP65 Rating

FEATURES

- **Housing:** IR Filtered photo diode sensor
- **Mounting:** Twist lock
- **UL Listed:** Wet locations

Sealed Light Fixture Sub Assembly

Molded of rugged, noncorrosive Lexan® plastic for a watertight sub-assembly! Makes a completely watertight fixture when used with a globe.

FEATURES

- Includes all gaskets, stainless steel screws and mounting feet for ceiling installation
- Maximum 60W incandescent bulb
- Economical and wash-down proof
- All openings feature water tight knockouts
- Gasketed two-piece design for easier wiring
- Four 3/4" F NPT openings at 90° spacing

4" Junction Box for Sealed Light Fixture

- Corrosion resistant
- Suitable for use in "wet" locations
- For use with all non-metallic wiring systems
- High impact, compression molded phenolic plastic rated to 302°F (150°C)

LGSFSAJB

Glass Globe

- Maximum 100W incandescent bulb
- 3" Diameter
- 7" Overall length

LGGG

Replacement Socket for Sealed Light Fixture

- High temperature porcelain lamp socket with 6-inch 18 AWG stranded wire leads
- Includes corrosion resistant nickel-plated brass screw shell
- Can be used with "A" Series incandescent lamp (150-watt maximum).
- Interchangeable with luminaires built with phenolic sockets

T8 Fluorescent Lights

- Strip lights have linear disconnect feature providing a safe, reliable means of disconnecting power to the fixture, saving money on utility bills
- Die-formed cold-rolled steel channel construction with numerous KOs
- End plate adjusts quickly in converting to snap-in channel connector for continuous row alignment
- Flip-up socket easily rotates and locks into place allowing for faster installation
- Lamp not included
- Optional reflectors in silver-lined reflector finish
- Multistage iron phosphate pretreatment ensures maximum bonding and rust inhibitor
- Bulbs not included.

ITEM NO.	DESCRIPTION	PRICE
LGFF4232	4' T8 Fluorescent Light Fixture - Bulbs not included	29.30

LG432	4' T8 Fluorescent Bulb - 4100K, 32 Watt	2.93

4' LED Vapor Tight Light

- 60 Watt
- 5000K
- 6600 Lumens

FEATURES

- High output LEDs provide 80+ CRI
- L70 is predicted to be greater than 120,000 hours
- Standard: Multi-volt (120 - 277V) input
- Suitable for ambient temperatures between -30°C to 55°C
- Driver standard with 0 - 10V dimming UL Listed

BENEFITS

- Energy saving compared to fluorescent systems
- Exceptional color rendering
- High system efficacy
- Long LED life

SPECIFICATIONS

- One-piece upper body; no seams to crack, break or leak
- Reinforced fiberglass body is rugged and corrosion resistant
- 5VA Flammability rating (will not melt or burn)
- Closed cell polyester gasket
- High gasket compression recovery ensures solid seal over life of fixture
- Knockouts on each end

Bulbs

LifeLamp

All LifeLamp™ LED bulbs were designed to withstand the punishment of poultry houses.

Each LifeLamp LED bulb includes a silicon seal between the base and body and between the body and lens cover (below) to ensure industry best water and moisture resistance.

Every LifeLamp LED bulb is designed with a 5V-V0 PBT plastic internal base and die cast aluminum body to ensure LifeLamp™ is fireproof. The LifeLamp™ lens cover is designed with Lexan polycarbonate plastic to eliminate cracking or shattering.

We recommend pairing LifeLamp LED bulbs with the LifeLamp dimmer for maximum performance. The LifeLamp Dimmer ensures LifeLamp bulbs will dim down to below 2% dimming levels, perfect for catch crews.

LifeLamp LED bulbs are available in different colors including 2700K, and 5000K. LifeLamp offers long life expectancy; approximately 25,000 hours to 50,000 hours, depending on the bulb.

Solid Warranty – LifeLamp LED bulbs warrantied for 5 years from Date Stamp

Lighting Tips

Kelvins (°K)

Kelvin is used in lighting to measure the color temperature of a particular light bulb. And in short, the higher the Kelvin rating (expressed in K), the whiter the light will be.

Lumens

Lumens measure how much light you are getting from a bulb. More lumens means it's a brighter light; fewer lumens means it's a dimmer light.

Watts

Watt is the electrical unit for the rate at which energy is generated or consumed. So, when you turn on a lamp with a 100-watt bulb in it, it's drawing 100 watts of electricity for every second it's lit. It is important to note that when buying light bulbs, wattage does not equal brightness.

LifeLamp – 6 Watt

FEATURES

- Sealed with a special silicon formula gasket which prevents water from infiltrating the bulb.
- Rated for 50,000 hours of use,
- Is warrantied for 5 years from the date stamp on each bulb.
- Every bulb rated for UL 8750 wet location use which is required for any poultry, turkey or swine live production environment!
- **Designed with a 230 degree beam spread preventing light spots.**
- When used with LifeLamp Dimmer, dims down to a level which cannot be measured by light meter at 8 feet!
- Fire retardant, blastproof, shatterproof polycarbonate cover and forged die cast aluminum body. No cheap plastic!
- Offered in different temperatures

Dimmers

Precision Lighting LED Dimmer

2400 watt digital light dimmer compatible with all dimmable LED bulbs.

The PLS-2400 STD digital light dimmer offers precise control over LED lighting systems. This dimmer maintains low end control to provide super low light levels and strong lamp re-ignition. Precise lighting control smooths out dimming issues including flickering, flashing, swirling and drop out. Compatible with house controllers with a 0-10 volt dc output for light dimmers.

FEATURES & BENEFITS

- 4 Dimmers in 1: L1-L2-L3-L4
- Twin outputs: A & B
- Environmentally sealed
- Lightning resistant
- "One shot" light for easy carcass removal

SPECIFICATIONS

- 120V 60Hz
- 2400 watt (1200w per channel)

ITEM NO.	DESCRIPTION	PRICE
LGDP2400	2400 Wt PLS LED Dimmer	302.50

LifeLamp Dimmer

Best-in-class reverse phase IGBT dimming technology

FEATURES

- Precise and consistent dimming control down to 1% brightness
- Helpful and informative 3-inch, backlit display
- Manual Mode: control your lights simply by setting dimming percentages on your own
- Slave Mode: have your dimmer accept 0-10V signals from a house controller
- Master Mode: set a schedule for your dimmer to follow automatically
- Intuitive Housewalk feature allows for seamless interruption of programming to perform house maintenance
- Operates smoothly between 110V and 240V without the need to change settings
- Easy to install with standard conduit already incorporated, simply trim to desired length and connect to designated lines
- Surge and short circuit protection included
- 2 independently operated 1000W channels allow for complete control of house

ITEM NO.	DESCRIPTION	PRICE
LGDLL20	2000 Wt LifeLamp Dimmer	248.75

Overdrive Dimmer

FEATURES

- Dual output zones can run independent lighting schedules
- 3 Programs – Master, manual, slave mode for quick and easy programming
- Programmable master mode for unmanned control
- Manual mode with keypad control
- Slave mode with 0-10V DC analog voltage control
- Supports memory function
- Supports ISP function and complies with EU-BUS protocol
- Integrated 1.3" OLED display
- Fully integrated digital control system for precise and consistent dimming
- 4kV surge protection, over voltage protection, short circuit protection
- Replaceable output fuses
- MOSFET control reduces dimmer power loss and runs cooler

SPECIFICATIONS

- 2 Channels
- 10 Amps per channel

4800 Watt Protec

FEATURES:

- Manual knob operation or 0-10 volt remote control
- A switch can choose to override the knob or the controller to be FULL ON or OFF
- Can provide a fast or slow sunrise and sunset with the lights
- This versatile light controller is microprocessor controlled to provide all this flexibility
- The dimming device is field replaceable

Controls

AVS 2240/2248 Control

Looking for a complete house control for your poultry facility? The AVS-2240 or AVS-2248 Controller is a whole house poultry management computer system. The AVS-2240/48 can monitor up to 12 temperature sensors, as well as static pressure, humidity, and 2 separate feed and water inputs. It has 40 relay outputs to operate all aspects of ventilation (heat, fans, openers, etc.), and control feed and lighting. This controller also records history of sensors and other inputs and the time use of the various ventilation units.

AVS I Touch Control

The AVS-i2240 I Touch features a large 10-inch "touch pad" navigation display. The user can select, swipe, drag, enlarge and compress similar to smart phones and smart pads. This control is WiFi ready, and will automatically connect to the FarmQuest Livestock Management website for password secure access by any internet capable device. This controller monitors up to 12 temperature sensors, static pressure and relative humidity for environmental control (heat, fans, openers, cool pads, etc.). It can control variable speed fans, multiple vents and tunnel doors, lights and dimmer schedule, feed and water programs. It can also monitor bird weight.

Rotem Pro

The Rotem Pro Controller has a large range of hardware combinations to enable an extremely flexible system design. Its modular design system enables management of all aspects of a poultry or swine house, including climate, feed, weighing and ventilation from a single controller. It works for all sizes of operations from standard to mega houses.

This cost-effective controller is perfect for poultry and swine operations is housed in a user-friendly, easy-to-install container. Its modular architecture enabled a high level of flexibility in its system design, supporting a large number of devices and up to 200 HP heavy-duty relays including expansion units. Rotem Pro's enclosure was designed to facilitate installation and maintenance, while a switch guard door keeps toggle switches securely in place.

FEATURES

- Large range of hardware combinations enables extremely flexible system design
- Less wiring to ventilation fans required when used in conjunction with the HUBs
- Expansion boxes support input/output devices, removing the need for additional controllers
- Improved software capabilities support an unlimited number of devices, including scales, meters, digital thermostats & more
- Extended longevity of hardware components
- Minimal internal heat improves durability in hot climates
- Reduced electrical noise levels inside the controller improve signal quality
- Simplified troubleshooting enables detecting faulty cards easily & quickly
- Heavy-duty enclosure simplifies installation & maintenance
- Multi-language support
- Safely remotely manage your farm with the intuitive RotemNet Web software, web-based software that allows remote control regardless of device – smart-phone, tablet or desktop.

Need Your Control Board Repaired?

We are able to repair yours at the fraction of a cost for a new one! Send it to us and one of our experienced technicians will repair it for you. Also, we have spare boards available for you to use so your downtime is minimal!

Maximus Control

The Maximus Controller System is a centralized controller system that simplifies farming facility management. Whether your facilities are for poultry, hogs, or dairy cattle, the Maximus System will track the state of your infrastructure and automate tasks based on your criteria.

MAXIMUS

FEATURES

- Graph reference for settings
- Compatible with most popular hand-held devices
- Very dependable hardware with a 5-year warranty
- I-Novarum compatible (production management solutions)
- Generates all alarms, by text or email
- Current draw & temperatures readings of all variable and relay outfits
- All relays & variables have fuse protection
- Auto winching for feed & water lines
- Static pressure compensation
- Zone temperature compensation for ventilation
- Bird scales, bin scales, WiFi communication
- Diagnostic menu
- And much, much more!

BENEFITS

- Well-being of your animals and reduced operational costs means improved profitability for your company
- Optimal conditions in your facilities at all times
- Automated management of a wide range of parameters: feeding, temperature, lighting, air quality, etc.
- Add features to your controller according to your company's evolution
- Quick and simple web updates ensure optimal technological solutions
- The information you want, the minute you want it
- Improved energy efficiency
- Guaranteed peace of mind thanks to the most reliable and safe system
- Automation of your I-Novarum production management system data collection
- Perfectly safe multi-platform remote control (personal computer, smart phone, electronic tablet)
- Unmatched real-time service
- Upgradable solution that adapts to your needs

DISPLAY AND SET-UP PANEL

- 5 character LED display screen shows longer descriptions
- Indicator lights for output status – show ventilation system at a glance
- Defective probe pilot light
- Independent temperature probe inputs – individual readouts
- 16 or more parameters accessed by dial – protection with lock out mode switch preventing accidental or unauthorized changes

CONTROL FEATURES:

- Displays absolute temperatures for all stages
- Inside and outside high/low temperatures for room average recordings
- Optional humidity probe with RH compensation
- Compatible with potentiometer feedback air inlet control
- Minimum vent timer selects desired time on and off – no limitations
- On/Off stages have selectable 2° F offset
- Sequential power-on with 5 second delay between stages
- Full-speed fan start-up for 2 seconds on variable output
- Motor curves for variable speed fans
- Ramping functions – 10 different set points – adjustments for current day
- Adjustable heater offset & differential
- 2 heating stages possible for controls with 2 or more thermo stages
- Dual zone heat mode allows 2 heaters on a single stage with individual sensors
- Easy access to internal adjustments – snap on latch

ALARM FEATURES:

- Test mode – runs through sequence to test settings and equipment
- Alarms for high/low and critical temperatures plus power failure
- Offset alarm for mist, heat and stage 2
- Includes standard alarm output

CURTAIN SETUP

- Simplified curtain/winch set-up using targeted temperature (absolute values)
- Curtain/winch can be set up to operate anywhere within ventilation control sequence
- Manual overrides for curtains
- Outdoor temperature influence on high alarm offset and curtain logic
- Normal and progressive timing option for curtains
- Built-in adjustable timer on natural ventilation stages

Variable Frequency Drives (VFDs)

OPTIONS INCLUDE

- Remote Keypad allows operation from up to 30 m from drive, cubicle mountable, IP65 rating
- Extended I/O modules can extend the standard drive I/O by up to 1 extra programmable form C relay output and 2 extra digital inputs
- External dynamic braking unit for drives rated up to 22 kW (\$30 kW include brake transistor as standard)
- External EMC filter to meet EN61800-3 (First and second environment, category C1 and C2)
- EEP1M1RA – EPM programmer enables you to easily duplicate, read, edit and archive the memory and configuration of the SMVector drives

T-15-WD Sealed Thermostat

240 VAC; 10A/60 Hz

ITEM NO.	DESCRIPTION	PRICE
FNTST	Sealed Thermostat T-15-WD	25.04

2 Stage Sealed Thermostat

Designed to control fans with a built-in low/high speed, the T152-2 two-stage thermostat has a watertight enclosure with temperature settings ranging from 32° F to 104° F. Includes a 316 stainless steel sensor for a quick response.

FEATURES/ADVANTAGES

- Differential 6° between stages; on/off 5° F minimum
- 316 stainless steel sensor for quick response
- Easy screw terminal connectors
- Adjustable ring for field calibration
- Designed to tolerate harsh environments, high humidity levels, and most corrosive conditions

ITEM NO.	DESCRIPTION	PRICE
FNT2SS	Thermostat 2 Stage Sealed	92.74

Time Clocks

Digital Time Clocks

This series offers an easy way to upgrade from a basic mechanical time switch to an electronic time switch. These timers will allow for up-to-the-minute programming, battery backup for power loss, up to 28 events total, and automatic daylight saving time corrections without the need of user interaction.

ITEM NO.	DESCRIPTION	PRICE
TMDFC120	120-240V Digital Single Channel TimeClock	168.08
TMDFC240	120-240V Digital Double Channel TimeClock	175.50

Intermatic Cycle Timer

Provides 8 selectable total cycle durations with cycling pattern selectable from 3% to 97% of total cycle SPST contacts. Can be wired in series with a manual switch or time switch for time-of-day cycling applications.

ITEM NO.	DESCRIPTION	PRICE
TMCTI	Intermatic Cycle Timer	124.70

Multi Operational Time Clock

- 24-hour, multi-operation time clock
- Manual on/off
- Override does not interfere with program

Choretronics Temperature Sensor

The Series 0-4 Outside Air Temperature Sensors are great for monitoring ambient air temperatures in outdoor applications. The temperature sensors are mounted in a NEMA 4X enclosure with integral mounting tabs. The mounting tabs can be used to surface or suspension mount the temperature sensors. The removable terminal block makes installation easy. The Series 0-4 can be used to measure outside air temperatures in building automation systems or room temperatures inside agricultural ventilation houses.

ITEM NO.	DESCRIPTION	PRICE
CT40741	Choretronics Temperature Sensor	11.17

120 Volt Time Clock

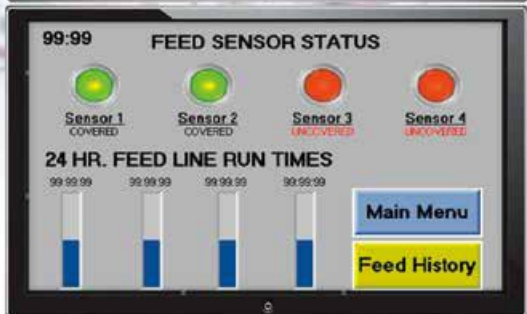

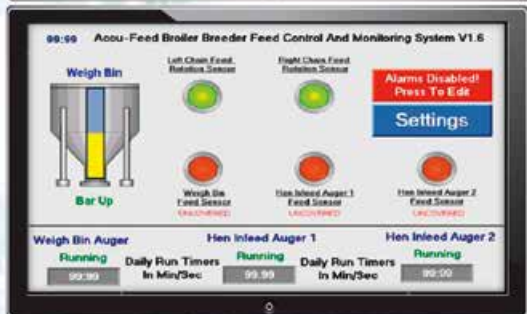

- Electromechanical timer
- Furnished with a maximum of 12 trippers
- Manual on/off override does not alter program
- Snap-out timing mechanism
- Up to 12 on/off settings per day

Alarms

Agri Alert 128 Touch

The Complete Alarm System

Monitor temperature, power, feed and watering systems, burglary, bio security and more. Agri-Alert continually monitors your operation and quickly notifies you upon the detection of common site problems or failures.

Display 128 Zones

View all 128 zones on a single screen; easily scan active alarms throughout the entire system.

One-Touch Zoom

With one-touch zoom in/out capabilities, quickly zero-in-on a specific zone group, increasing the tile size and information visible for each

Filter Zones By Status

Easily view zones that may need immediate attention. For example, by selecting the Bypass Mode icon, any zone that is currently set on bypass is isolated.

Filter Zones By Type

Quickly view all zones of a specific function. For example, by selecting the Temperature icon, all zones associated with temperature are isolated and can be viewed at once.

Historical Information

With one touch, view historical information and records for each zone.

Easily Adjust Values

Within each individual zone, click the Pencil icon to easily adjust values and limits such as temperature setpoints.

Agri Alert 800EZ

The Agri-Alert 800EZL is a complete alarm system that can monitor outside temperature, power, feed and watering systems, burglary, bio-security and more. This system constantly monitors your operation and quickly notifies you upon the detection of common site problems or failures. Call in from off-site for zone temperature and system status reports.

FEATURES

- Graphical LCD screen allows you to view information quickly and clearly and is easy to navigate through menus
- Monitor up to 8 zones
- Acknowledge alarms by phone
- Call in from off site for zone temperature and system status report
- Spike Block surge/lightning protection on all zone inputs and system outputs
- Reliable rechargeable battery back-up
- Programmable alarm recall feature for acknowledged but unresolved alarms
- Self-diagnostics of complete system including wiring, sensors, outputs, fuses, battery, and more
- Independent output for a local siren or revolving light
- Non-volatile memory for all programmed parameters
- Security with up to 10 programmable user access codes
- Alarm memory log with time, user & date stamp
- Dialing of alarms to multiple phone numbers
- Built-in phone line seizure for added security
- Share phone line with other devices, no second line required
- Off-site phone-in capabilities for checking temperatures and other system functions
- Moisture and dust-tight ABS enclosures for harsh environment locations

Sensaphone 400 & 800

Protect Your Investments Even When You're Away.

The Sensaphone® Alarm Monitor is an inexpensive way to monitor any type of facility. Once the Sensaphone® detects a problem, it automatically starts dialing your pre-programmed phone numbers and advises you of the problem. It continues to dial until someone responds to the call.

SENSAPHONE 400 FEATURES

- Each unit monitors power and temperature
- 4 configurable inputs
- Dials up to 4 phone numbers
- Line seizure feature gives the unit the ability to "seize" the line when it needs to dial unit
- Custom voice messaging
- Dials a pager or cell phone
- Listen-In feature allows you to hear on-site sounds
- Output for siren

SENSAPHONE 800 FEATURES

- 8 configurable inputs
- Dials up to 8 phone numbers
- Monitors power and temperature
- Line seizure feature gives the unit the ability to "seize" the line when it needs to dial out
- Custom voice messaging
- Dials your pager or cell phone
- Listen-In feature allows you to hear on-site sounds
- Siren output

Thermal Alarm Thermostat

The Thermalarm III uses sealed magnetic switches to trigger an alarm condition. The Thermalarm III features a normally open dry contact that will close upon the temperature exceeding the high or low temperature alarm set-points, activating an alarm.

FEATURES/ADVANTAGES

- Corrosion resistant
- Simple set-hand adjustment
- Quick to respond to temperature change
- Works with most alarms
- Temperature Range: 20° - 110° F

Fans

Val-Co

Galvanized Z-Fans

The next big thing in rust-resistant ventilation,

The Z-Fan is coated with a unique alloy compound that is more durable than galvanized steel and more cost-effective than fiberglass.

FEATURES

- Superior protection against ammonia and moisture that cause corrosion on the parts that need it most: housing panels, cone sections, and dampers.
- The "self-healing" coating forms a protective layer over cut edges and scratches over time to increase fan life.

*The Z-Fan housing is covered by a 7 year warranty when used in poultry applications.

Double L

Circulating Fans

DOUBLE L GROUP LLC

FEATURES

- Reduces temperature stratification by mixing cold air on floor with hot ceiling air, tempering air and creating more uniform air temperatures throughout house
- Less heater cycle times and lower fuel costs
- Drier litter, lower ammonia concentrations, better flock performance
- Widespread grill reduces dirt buildup and allows for easier cleaning of fan
- Mounting bracket included to easily swivel and tilt fan for ease of cleaning and to change direction and angle of house air circulation
- Very beneficial in old houses that are not tightly sealed

Maintenance Tips for Fans

- Make sure the propeller is secure on the shaft and there are no signs of damage.
- Ensure the belts are properly tensioned.
- Lubricate the pillow block bearings on a quarterly basis.
- Clean the fan. Using a brush or cloth, remove any dust from the motor.
DO NOT USE A PRESSURE WASHER ON THE MOTOR!
- Clean excess dirt from the fan shutters. Dirty fan shutters can cause a 45% loss of your fan's capacity.
- Clean dust from the fan guards with a brush. Excess dust can reduce airflow.
- Remove any dust from the fan housing using a pressure washer.

Double L

TJ4200 Ceiling Air Inlet

DOUBLE L GROUP LLC

- Approx. 1,812 cfm @ .125 SP; Rough opening 22.5" x 22.5"
- 4-Directional louvers direct air along the ceiling and hold air up longer while mixing with room air, distributing air evenly
- Mixes warm tempered air from attic with house air along ceiling for better mixing and prevents downdrafts on birds
- Less drafty conditions and chilling during brooding
- Engineered to allow more CFM through inlet and operates at a higher static pressure for better air mixing
- More uniform house temperatures during minimum ventilation
- Drier litter, lower fuel costs, and lower ammonia concentrations
- Easy snap together assembly – no tools required

ITEM NO.	DESCRIPTION	PRICE
INTJ4200	TJ4200 Ceiling Air Inlet	80.04

2 Way Ceiling Vents

These inlets are great for when you need precise control of air movement. The curved blades direct air along the ceiling, providing proper air mixing, minimizing condensation, and preventing the inlets from freezing up. They are constructed of PVC and are able to withstand pressure washing, but are fully insulated to prevent condensation. There is no exposed insulation on the lid. Mounting hardware comes preinstalled in the inlet for easier installation.

High Pressure Polair Fogger Systems

The PolAIR High Pressure Fog System atomizes water into billions of micron-sized droplets which flash evaporate upon contact with the air for the greatest possible temperature reduction. They are custom designed and installed with little to no modifications. This system is used in layer, broiler, breeder and turkey houses to provide temperature and humidity control during critical phases of poultry production.

POLAIR COOLING BENEFITS:

- Reduces mortality rates caused by heat stress
- Increases egg mass and quantity during the summer
- Accelerates weight gain, allowing broilers to go to market sooner/heavier
- Provides even cooling throughout the building

HUMIDIFYING BENEFITS:

- Provides excellent dust control
- Maintains ideal humidity range during brooding
- Disinfection and air sterilization

Electric Winches

SafeTrac Winches

The Curtain and Inlet Operators from VAL-CO® are made for the long haul because they are specifically engineered for optimum performance in the harshest conditions. SafeTRAC Gen III Operators are the most durable performers in the business and they will provide you with a smooth and quiet operation for many years. The newly-redesigned indoor SafeTRAC Gen III Acme-screw models are available in 24", 36", 48", and 72" sizes with a 110/220V, 60/50Hz, 1PH motor for domestic and international use.

EACH MODEL ALSO INCLUDES:

- Installation options to fit any application
- Greasable needle bearing pulleys
- Helical gears for maximum efficiency and performance
- Safety features to prevent over-run damage
- Up to 4,000 lb. (1,800 kg.) capacity
- Interior installation
- Polymer thread block engineered for superior performance and longevity

2000 lb. Worm Gear Winch

FEATURES

- 2000 lb. capacity
- Self-braking
- 41:1 gear ratio
- Loop drive
- Drum dimensions: 4 3/4" OD & 1 1/4" ID
- 1/8" cable capacity: 134' (67' per side)
- Oven-cured epoxy coating lasts longer than conventional zinc, chrome, or enamel finish
- Shafts and gears are made of high tensile alloy steel
- All gears are heat-treated, high-carbon steel to provide longer life

CBW20W

5000 lb. Winch

FEATURES

- 5000 lb. capacity
- 2500 lb. working load (1250 lbs. pulling in opposite directions)
- 90:1 ratio
- 2" diameter divided reel
- Holds approximately 64' of 3/8" cable
- Reel is pre-drilled and tapped to accept strap kit
- Can replace 2 conventional winches
- Oven-cured epoxy coating lasts longer than conventional zinc, chrome, or enamel finish
- Shafts and gears are made of high tensile alloy steel
- All gears are heat-treated, high-carbon steel to provide longer life
- Recommended 2:1 double-back for loads exceeding 2500 lbs.

CBW5000

Electric 5000 lb. Feeder Winch

FEATURES

- 5000 lb. capacity
- 2500 lb. working load (1250 lbs. pulling in opposite directions)
- 90:1 ratio
- 2" diameter divided reel
- Holds approximately 64' of 3/8" cable
- Reel is pre-drilled and tapped to accept strap kit
- Can Replace 2 Conventional Winches
- Oven-cured epoxy coating lasts longer than conventional zinc, chrome, or enamel finish
- Shafts and gears are made of high tensile alloy steel
- All gears are heat-treated, high-carbon steel to provide longer life
- Recommended 2:1 double-back for loads exceeding 2500 lbs.

Carbon Steel Drinker Rod

FEATURES

- Made from 1/8" spring wire
- Use to replace conventional main cable on drinker lines
- Will not stretch like cable and high tensile wire

ITEM NO.	DESCRIPTION	PRICE
INRCS39018	390' Carbon Steel Drinker Rod	78.65
INRCS49018	490' Carbon Steel Drinker Rod	98.73
INRCS59018	590' Carbon Steel Drinker Rod	123.45

Carbon Steel Inlet Rod

FEATURES

- Made from 3/16" spring wire
- Will not stretch like cable and smaller high tensile wire

ITEM NO.	DESCRIPTION	PRICE
INRCS390	390' Carbon Steel Inlet Rod	142.50
INRCS490	490' Carbon Steel Inlet Rod	165.37
INRCS590	590' Carbon Steel Inlet Rod	199.13

Rope

RPS14

Nylon Rope

- Hollow braid construction
- 100% polypropylene
- UV-treated for long life

OG6961866

- Made with 100% polyester
- Less stretch than cheaper nylon cord
- Best for winching curtains, drinkers & air inlets

ITEM NO.	DESCRIPTION	PRICE
RPN18	1/8" Nylon Rope 1000' Roll	20.30
RPN532	5/32" Nylon Rope 1000' Roll	35.25

Pulleys

CBP07N

7/8" Nylon Pulley

FEATURES

- 7/8" nylon sheave
- Galvanized steel housing
- For winching drinkers & air inlets

CBP2N

2" Nylon Pulley

For winching feed lines and curtain

CBP35N

3 1/2" Plastic Pulley

FEATURES

- 3 1/4" fiberglass reinforced nylon sheave
- Heavy-duty zinc plated straps and bolts
- Composite wheels will not corrode
- Self-lubricating
- Deep groove
- Use with cable up to 1/4"
- Maximum load limit: 300 lbs.
- A true load-bearing pulley
- Our best pulley for winching heavy breeder nests

CBP35CNB

3 1/2" Cast Pulley w/ Needle Bearing

FEATURES

- 3 1/2" cast iron sheave
- Heavy-duty zinc plated straps and bolts
- Grease zerk for easy lubrication
- Deep groove
- Use with cable up to 1/4"
- Maximum load limit: 700 lbs.
- Use with curtain machines and as master pulleys on feed and water lines

CBP45CNB

4 1/2" Cast Pulley w/ Needle Bearing

FEATURES

- 4 1/2" cast iron sheave
- Heavy-duty zinc plated straps and bolts
- Grease zerk for easy lubrication
- Deep groove
- Use with cable up to 1/4"
- Use with curtain machines and as master pulleys on feed and water lines

ABM PANEL

Heavy-duty 28 gauge steel - in over 30 energy-efficient colors with 40-year paint warranties - heat formed for ultimate rust protection.

ABSeam PANEL

The premium ABSeam Panel is the ultimate choice for a beautiful, long-lasting roof. Thanks to the ABSeam hidden clip system, no screws or punctures are visible to the eye or exposed to the elements.

Wire & Panels

Trusscore

Wherever you need a smooth finish that is easy to clean, low-maintenance, and abuse-resistant, TRUSSCORE PVC Sanitary Wall and Ceiling Panel has your project covered. Trusscore's unique tongue-and-groove interlocking system makes both vertical and horizontal installation quick and easy.

KEY ADVANTAGES

- Bright clean appearance
- Virtually maintenance free – Just wipe it clean
- Meets CFIA and FDA requirements for walls and ceilings
- Comes in standard and custom lengths
- Corrosion-resistant
- Economical, excellent investment
- Hidden fasteners
- High strength to weight ratio
- Highly resistant to moisture and most chemicals
- Ideal replacement for conventional wall systems
- Inner truss design for rigidity and strength
- Lightweight, fast easy installation
- Potential insurance savings
- Supports attic insulation loads
- Pre-punched nailing flange

Creep Panels

Designed for use in farrowing crates, PVC creep panels have many structural and performance benefits. Besides being more economical, PVC panels are easy to install, light, strong, versatile, durable, and easy to clean. Warmer than metal, these dividers are an ideal material for creep dividers. PVC divider panels are 20" high by $\frac{7}{8}$ " thick and can be field cut to fit.

Shade Cloth

Great for "do-it-yourself" applications.

- Lightweight with high tensile strength.
- Can be cut without unraveling.
- Can be bordered with tape and grommets for extra durability.
- Highly resistant to UV degradation and temperature extremes.
- Effective odor barrier, as knitted panels capture the dust carrying particles that spread odor

IDEAL FOR

- Livestock Housing
- Poultry Buildings
- Greenhouses
- All Hoop Style Structures
- Fencing
- Wind Barrier
- Odor Barrier
- Truck Covers
- Equine Housing
- & Kennels

Flooring

Poultry Flooring

Sani-Slat

The Sani-Slat flooring system is manufactured of high quality 100% virgin plastic materials produced in the USA.

They can be used to replace wood slats in both layer and breeder houses. They offer a longer life than other slats. Another important feature in the design is the layers/breeders have a comfortable footing due to the smoothed edges which means a reduction of foot problems and breast blisters.

ADDITIONAL INFO

- The overlapping tabs are designed for easy assembly for either wood or metal support systems. Due to the special design of this slat, it requires fewer screws to be used during assembly. This means you will save both on installation time and cost.
- The Sani-Slat should be stored out of direct sunlight, which can shorten the life of the product.
- Leave stretch wrap on pallets until you are ready to install them.
- Exposure to outside elements for extended periods of time may also cause damage to the product and void warranties.
- Exposure to extreme heat or cold will cause the plastic to expand and contract. Be sure to place in the building with a minimum temperature of 40 degree F (5 degree C) for 24 hours before installing. This temperature should be maintained during the installation.
- Please take care in transporting plastic slats. Do not expose the slats to excessive force such as impacts.
- Workers should take care to walk on the slats where there are wood or metal frame supports present.
- Replace any broken slats immediately.

White

2x4 Sani-Slat HDPE

The slat measures 2' x 4' and has large 1" square hole openings with a specially designed non-porous surface; this allows for easy manure passage which assists with the prevention of manure build-up and bacteria. This provides a more sanitary environment for the bird and slat eggs when compared with wooden slats.

2x4 Sani-Slat PP

High strength polypropylene for use with steel support.

2x5 Sani-Slat XL HDPE

- The Sani-Slat XL is larger (12 inches wider) than the original Sani-Slat, but only requires 16 screws per slat.
- It's faster, easier, and less expensive to install
- This new design allows better stacking for reduced shipping costs.
- Exceptional strength and rigidity
- Still just as great for hygiene!

Kennel Slats

Made of high-impact polypropylene plastic, providing superior impact and wear resistance. It will not rust, rot, or corrode. Its non-porous surface features square openings .875" x .875" or 1.1" x 1.1", providing a clean, comfortable floor that keeps animals healthy and happy. The smooth surface reduces pad problems and inhibits the growth of bacteria. It is designed to withstand high-pressure washing and disinfectants. It can withstand up to 630 lbs. of pressure.

Microbe-Lift

Microbe-Lift/DFP

Specially formulated for manure pits over slatted floors, outdoor manure lagoons and vertical holding tanks.

NonGMO, non-pathogenic, highly active culture and enzyme formulation designed to liquefy, activate and enhance manure value and create bio-active manure slurry beneficial to all plants and crops.

FEATURES

- Novel biological formulation
- Reduces surface & bottom solids
- Provides a consistent manure slurry from first load to last load
- Reduces manure mixing at time of removal
- Reduces odor in the barn and on application
- Reduces odorous pest attractant
- Improves manure value & controls nutrients loss once applied
- Fixes nitrogen, controls runoff
- Increases root zone activity & crop yield
- Dual treatment value, pit & crop benefits

ITEM NO.	DESCRIPTION	PRICE
MNMLD1	Microbe-Lift / DFP 1 Gallon	23.93

Microbe-Lift/Hog

Specially formulated for manure pits over slatted floors, outdoor manure lagoons and vertical holding tanks. ITEM NO.	DESCRIPTION	PRICE
MNMLH1	Microbe-Lift / Hog 1 Gallon	23.93

Microbe-Lift/Odor Control

MICROBE-LIFT®/AOE-P utilizes biotechnology to maintain a cleaner, healthier environment for poultry houses and yards. Poultry manure is very high in nitrogen content, a factor which leads to the emission of high concentrations of ammonia when litter becomes increasingly fouled. As a result, toxic concentrations of ammonia can build up in poultry houses. Typically, ventilation is utilized to remove ammonia requiring additional heat to replace heat loss.

FEATURES

- Reduces atmosphere ammonia concentration and associated toxicity by reducing ammonia gas generation for manure in litter
- Improves health and increases poultry production rate
- Provides utility cost savings
- Reduces odors
- Accelerates degradation of litter wastes
- Increases the nutrient value of the litter for composting
- Effective on all types of poultry waste
- Reduction of ammonia emission from chicken manure by MICROBE-LIFT AOE-P
- Convenient to apply. Simply dilute and spray on litter
- Effective Temperature Range: Application: 45°-95° F; Storage: 32°-100° F

ITEM NO.	DESCRIPTION	PRICE
MNMLP1	Microbe-Lift / AOE-P 1 Gallon	23.93

Microbe-Lift/Odor Control

Microbial-based odor reduction. Hydrogen sulfide, mercaptans, amines. On contact performance. MICROBE-LIFT®/OC is designed specifically for the control of gaseous odorous reaction in contained wastewater systems, to include waste sumps, re circulation cleaning systems, storage lagoons and wastewater biological systems. OC is a highly active microbial-based formulation that contains proprietary ingredients that function as reactive collection sites. These reactive compounds act as macromolecular sponges blocking and permanently binding biological produced odorous reactions

Pest Control

Fly Bait

**The Average Housefly Lives 21 Days.
After Eating QuickBayt®, It's 60 Seconds!**

QuickBayt® Fly Bait is a ready-to-use dry scatter bait. Special combination of two powerful attractants make it irresistible to flies. Contains Bitrex® bittering agent to help prevent accidental ingestion. Use indoors or outdoors.

FEATURES

- Starts killing nuisance flies in as little as 60 seconds
- Its red pellets contain two fly attractants to lure flies
- Fast acting, effective, convenient and versatile
- Contains Bitrex®, a bitter substance to help prevent accidental ingestion by children and animals
- Kills flies resistant to organophosphates and carbamates
- Ready to use as scatter bait, but also easy to use in bait stations or as a paint-on

ACTIVE INGREDIENTS

- 0.5% Imidacloprid
- 0.1% Z-9 tricosene

APPLICATIONS

- Scatter in areas where house fly numbers are excessive or where house fly breeding occurs. Apply at a rate of 1.5 oz. (3 tbsp) / 250 sq. ft.; **OR**
- Place QuickBayt® in bait stations out of animal access at least 4 ft. above the ground, in a motionless site where flies rest; **OR**
- As a paint-on, mix 3 lbs. of QuickBayt® with 1 qt. water and paint on surfaces where house fly numbers are excessive

ITEM NO.	DESCRIPTION	PRICE
FHFBQB5	Quick Bayt 5 lb. Pail	40.30
FHFBQB40	Quick Bayt 35 lb. Pail	187.65

Residual Fly Spray

FEATURES

- For broad spectrum control of crawling, flying, and wood-infesting insect pests in and around animal housing, warehouses, and processing and packing plants.
- Exclusive PolyZone technology creates a microscopic polymer film that protects from weather, precipitation, irrigation, and mechanical abrasion.
- This product is designed for both indoors and outdoors and will provide effective knockdown and long residual control of the pests listed on this label.
- Residual control that lasts for up to 90 days.
- This product is intended to be mixed with water and applied with hand pressurized or power operated sprayers.

Rodent Bait

Liphatech is a global leader in the research, manufacturing and distribution of innovative pest control products. They developed chlorophacinone, bromadiolone and difethialone, three of the industry's active ingredients. Stay ahead of the rodents and prevent disease outbreaks on your farm with this line of rodent baits from Liphatech. Their soft baits are wax free, so they won't melt in hot temperatures. Formulated with a mixture of milled grains and vegetable oils, they are palatable to rodents.

3 Rotational Options, 3 Active Ingredients, Liphatech

Control Rodents, Lower Feed Costs, Reduce Building Damage

Boothill™

RBBMB20

FEATURES/ADVANTAGES

- Works well where moisture is a concern
- Whole food-grade grains make it the number one taste preferred by rats and mice
- USDA authorized for rodent control in federal inspection programs
- Contains Vitamin K₁ Antidote, the same as all other anticoagulants
- Can be placed indoors and outdoors in bait stations for maximum baiting flexibility

ACTIVE INGREDIENT: Bromadiolone

BAIT COLOR: Tan

MODE OF ACTION: Second-Generation Anticoagulant

EFFECTIVENESS TIME FRAME: 4-6 Days

ITEM NO.	DESCRIPTION	PRICE
RBBMB20	Boothill Mini Blocks 20 lbs.	79.90

Hombre™

RBHMB20

FEATURES/ADVANTAGES

- Whole grains combined with less wax and dye contributes to the great taste
- One ¾ oz. mini-block can control up to 53 mice
- Notably effective for roof rat control
- Flexible formulations to meet various baiting needs
- Contains Vitamin K₁ Antidote, the same as all other anticoagulants
- Authorized for rodent control in federal inspection programs
- Cost effective, more placements per container

ACTIVE INGREDIENT: Difethialone

BAIT COLOR: Tan

MODE OF ACTION: Second-Generation Anticoagulant

EFFECTIVENESS TIME FRAME: 4-5 Days

ITEM NO.	DESCRIPTION	PRICE
RBHMB20	Hombre Mini Blocks 20 lbs.	83.75

Revolver™

RBRSB16

FEATURES/ADVANTAGES

- Outperforms competitive wax blocks and pellets
- Low cost per placement
- 0% wax = fast acceptance and control
- Less bait waste, saving you money
- Will not melt in high temperatures
- 12-gram pouch fits in hard to reach places

ACTIVE INGREDIENT: Bromadiolone

BAIT COLOR: Green

MODE OF ACTION: Second-Generation Anticoagulant

EFFECTIVENESS TIME FRAME: 4-5 Days

ITEM NO.	DESCRIPTION	PRICE
RBRSB16	Revolver 16#	84.37

Rodent Bait

FastDraw™

RBFSB16

FastDraw™ is a no-wax, soft bait that is highly palatable and an excellent option for controlling rodent infestations. The active ingredient is Difethialone, a second-generation, single-feed anticoagulant. Difethialone is formulated at 25 PPM (parts per million). This bait maintains its palatability and integrity (shape) in extreme hot and cold environments. Excellent for high temperatures and summer baiting.

FEATURES/ADVANTAGES

- Powerful Attractants – Gets infestations quickly under control
- Convenience & Versatility – Perfect for challenging placements above clean-out pits and subfloors
- Faster Results – Combines bait integrity of mini-blocks with money-saving, targeted dosing of place-packs
- Maximum Attraction – Even with competing food sources nearby. Contains food-grade grains and oils and no wax
- Draws In Rodents – Aroma escapes through breathable pouch and encourages feeding
- Works Quickly – Rodents generally accept within 24 hours; kills in 4-5 days
- Can be baited directly on the vertical rods in bait stations

ACTIVE INGREDIENT: Difethialone

BAIT COLOR: Green

Rodent Bait

Motomco has nearly 40 years experience in the development of proprietary rodent bait formulations. They use an extensive array of high quality, food-grade ingredients, many of which are purchased in small batch quantities to ensure freshness. They synthesize their own active ingredients to ensure their purity and consistency. In short, Motomco is a world-class formulator and manufacturer of the most comprehensive line of rodent baits.

Jaguar

FEATURES/ADVANTAGES

- Made with the active ingredient Brodifacoum, a second-generation anticoagulant
- Excellent for areas of heavy rodent pressure and tough, hard to control infestations
- Rats and mice may consume a lethal dose in one night's feeding with first dead rodents appearing 4-5 days after feeding begins
- Mold and moisture resistant

ITEM NO.	DESCRIPTION	PRICE
RBMJC09	Jaguar Chunx 9 lbs.	42.43

RBMJR73	Jaguar Rodenticide 50GM 73S	50.75

Rampage

Specifically formulated for use in production livestock facilities, especially swine & poultry operations.

FEATURES/ADVANTAGES

- Higher melt point and an enhanced preservative system
- Use Rampage All-Weather Bait Chunx in a rotational program for at least 2 months
- Including a non-anticoagulant active at least once a year is critical to rotation to reduce any potential resistance issues in a population
- Rampage All-Weather Bait Chunx are mold & moisture resistant and can be used in many different conditions

ITEM NO.	DESCRIPTION	PRICE
RBMRC04	Rampage Chunx 4 lbs.	50.73
RBMRC09	Rampage Chunx 9 lbs.	106.86

Hawk

FEATURES/ADVANTAGES

- Made with the active ingredient Bromadiolone, a second-generation anticoagulant
- Rats and mice may consume a lethal dose in one night's feeding with first dead rodents appearing 4-5 days after feeding begins
- Use Hawk Bait Chunx in a rotational program for up to 6 months, especially for regular maintenance baiting during spring & summer
- Formulated with an optimal blend of ingredients and low wax content for maximum palatability and weatherability
- Mold and moisture resistant
- Unique block shape and edges preferred by rodents that like to gnaw
- Contains holes for placing on rods in a bait station, or can be secured using nails or wire

ITEM NO.	DESCRIPTION	PRICE

Agrid 3

FEATURES/ADVANTAGES

- First and only rodenticide listed by OMRI (Organic Materials Review Institute) for use in Organic Production
- Active ingredient is Cholecalciferol (Vitamin D3), an acute rodenticide
- High melt point - blocks are stable up to 200 degrees
- Agrid3 Bait Chunx are mold & moisture resistant and can be used in damp environments

ITEM NO.	DESCRIPTION	PRICE
RBMA3	Agrid3 Organic Chunks 4 lbs.	33.99

Bait Stations & Mouse Traps

Aegis™ Mouse Bait Stations provide more rodenticide capacity and convenient placement flexibility for vertical or horizontal mounting. The design allows for two blocks of rodenticide to be safely secured inside. The see-through tunnel entices mice to enter and feed. Available in a clear lid model with rotating hinges or an economical solid black model with living hinge.

Note: Designed for use with Liphatech® (Boothill™, Hombre™ & Gunslinger™) mini blocks ONLY. Regular sized blocks/chunx will NOT fit in this station.

FEATURES/ADVANTAGES

- Easy and fast to service
- Easy-open lid allows for quick replacement of rodenticides
- Solid black lid model has a living hinge for lower costs
- Heavy-duty construction
- Anchoring holes for securing the station to floors, walls or pipes
- Includes key
- Dimensions: 5½"L x 4½"W x 1½"H
- Weight: 8 oz.

Water Line Cleaner

Cid 2000 Pro

2.6 gallons; Cid 2000 Pro is an ideal product for the removal of heavy soils and scale/mineral build up in the drinking water system.

DIRECTIONS FOR USE

Cleaning the system when not in use:

- To clean the system, use a 2% solution/2.5 oz. per gallon of water and leave to work in the system for 12-24 hours.
- After 12-24 hours, rinse with plenty of clean water to make sure all of the product is out of the entire system including nipples or cups.
- Make sure the animals do not have direct contact with the product at these levels.
- After flushing the system with clean water, it is recommended to follow your cleaning process with an EPA registered water line sanitizer or disinfectant to use continuously with animals present.

While cleaning the operating system, never mix any other product with Cid 2000 Pro.

Mineral Clean

1 gallon

- Removes mineral build up.
- Reduces PH.
- Equipment friendly.

ITEM NO.	DESCRIPTION	PRICE
FHWLCC2000	Cid 2000 Pro	71.99
FHPCM	Mineral Clean	36.25
FHPC	Proxy Clean	42.50

Proxy Clean

DIRECTIONS FOR USE

Directions for cleaning when the system is not in use:

- Determine the capacity of the drinking water system.
- Prepare a 1-3% solution, depending on contamination.
- Apply the solution.
- Remove the cap at the end of the drinking system to check for fizzing reaction, to determine that Proxy-Clean has reached every point.
- Activate all nipples or cups
- Allow the solution to circulate if possible
- If circulation is not possible, the system must stand full for at least 12 hours
- After cleaning, thoroughly flush with water.
- Reactivate all nipples and cups.

Backyard Poultry & Farm Supplies

Waterers

Plasson Breeder Drinker

Made of a rugged high-impact plastic, formulated to withstand the ravages of the active poultry house for many years, each bell drinker features a ballast bottle, which acts independently of the bell and eliminates wear on the valve mechanism. Plus, Plasson bell drinkers ensure a constant water level and a dry floor; once a bird drinks as little as 10 grams (0.3 oz.) of water, this highly sensitive and maintenance-free system is activated. Our bell drinkers support new humane growing practices for complexes with natural certifications.

Approximately 10-12 PLASSON Breeder Drinkers are needed per 1000 adult birds. *(In hot climates, 12-14 drinkers per 1000).*

INSTRUCTIONS FOR USE

- For optimum efficiency, the working pressure is as follows: (6-8 psi).
- The pressure can be regulated by means of a pressure regulator or via a head tank.
- The ballast bottle should be completely filled with water up to the water level line. In frost prone areas, add antifreeze to the water.
- Adjust drinkers to the proper drinking height, always keeping the drinker lip a little higher than the bird's back.
- Keep water level in the bell trough as low as possible.

ITEM NO.	DESCRIPTION	PRICE
WTPBRD	Plasson Breeder Drinker	52.04

Cyclone Biddie Drinker

The Biddie Drinker is an economic way to start chicks. They are made of corrosion free plastic and super easy to clean. It has an adjustable water level and float valve, allowing the drinker to shut off independently.

ITEM NO.	DESCRIPTION	PRICE
WTCBD	Cyclone Biddie Drinker only	8.92

Plastic Poultry Waterer

This waterer is made of heavy-duty polypropylene, making it able to withstand cracking from cold weather. Its simple screw-on design makes it easy to assemble. The watering ring is designed to combine with the jar to create a gravity-fed waterer.

ITEM NO.	DESCRIPTION	PRICE
FRPW1Y	Plastic Poultry Waterer (1 gallon)	4.67

Automatic Poultry Waterer

Never carry water to your birds again!

Great new design includes a 0.75 inch hose that attaches to a standard garden hose for a continuous flow of fresh water for your flock. Automatic float controls the water level so there is no spilling or overflow. Oversized cover extends beyond the edge of the bowl to prevent roosting and keep debris out of the water. Easy to assemble, easy to clean. Bowl is made of high-density polyethylene, cover is white polypropylene attached to a metal bracket. Designed for use with adult birds (not intended for baby chicks).

ITEM NO.	DESCRIPTION	PRICE
FRPWA5Q	Automatic Poultry Waterer (5 qt.)	30.39

Poultry & Game Bird Waterer

This large-capacity automatic poultry waterer features a vacuum-sealing O-ring cap that creates an automatic water flow. Made of dent-proof, heavy-duty translucent plastic that allows you to see the water level. The easy-to-fill jar snaps compactly onto the base, and the rugged handle makes transport around the yard easy. This is a durable unit that will stand up to plenty of use.

ITEM NO.	DESCRIPTION	PRICE
FRPW12	Poultry & Game Bird Waterer (3 gallon)	29.99

Feeders

Kuhl Hanging Feeder

This feeder's built in grill helps to reduce extra feed waste. It is constructed of heavy-duty polypropylene plastic to prevent cracking over time and from cold weather.

ITEM NO.	DESCRIPTION	PRICE
FDHFKP35	35 lb. Kuhl Hanging Feeder w/ Built In Grill	17.99

Brower Hanging Feeder

This feeder's tapered body ensures sufficient feed flow. It is constructed of heavy-duty plastic to prevent cracking. It has exclusive wire snap adjustments with 3 feed adjustment settings. It comes with a 3" deep pan and feeds approximately 45 birds.

ITEM NO.	DESCRIPTION	PRICE
FDHFBP30	30 lb. Brower Hanging Feeder Plastic	20.32

Super Bowl Bucket Feeder

Feeder holds approximately 50 pounds of feed. The polished surface allows for easy cleaning. Snap together design makes assembly quick and easy.

Chick Feeders

DURA-GRO Chick Starter Feeder

FEATURES

- Constructed from virgin high-density polyethylene
- Reinforced stress points
- Can be manually or automated filled
- 50-100 birds per feeder
- Improves flock uniformity and minimizes feed waste
- Easy to stack & store

ITEM NO.	DESCRIPTION	PRICE
FDCSPDGH	DURA-GRO Chick Start Pan - 10 lb.	2.29
FDCSPDGL	DURA-GRO Chick Start Pan - 9 lb.	2.23

Turbomate Chick Start Pan

The Turbomate is a chick feeder designed to use for the first 14 days. It provides easy access to feed while minimizing waste. Place between automatic feeders and replace your other floor feeding systems.

FEATURES

- Fits both ribbed and smooth feed tube types
- Recommend one Turbomate for every 75-100 chicks
- When finished, close off feed and rotate up 180 degrees for storage
- On smooth feed tubes, install the Turbomates in alternating directions to counterbalance the weight.
- On ribbed feed tubes, install an adjustable feeder hanger every 30 feet of feed tube to offset any tilting of feed line
- 8.5" tall from bottom of feed tube to bottom of pan
- This version is not compatible with taller feeders such as the Chore-Time Revolution and the Big Dutchman Fluxx feeder.

ITEM NO.	DESCRIPTION	PRICE
FDTMCSP	Turbomate Chick Start Pan	5.47

Turbomate High Chick Start Pan

The Turbomate 1 Long Version is a chick feeder designed for taller feeders such as the Chore-Time Revolution and the Big Dutchman Fluxx feeder. Like the regular Turbomate, it is designed to use for the first 14 days. It provides easy access to feed while minimizing waste. Place between automatic feeders and replace your other floor feeding systems

FEATURES

- Fits both ribbed and smooth feed tube types
- Recommend one Turbomate for every 75-100 chicks
- When finished, close off feed and rotate up 180 degrees in either direction for storage
- 9.63" tall from bottom of feed tube to bottom of pan
- 2.65 lb. feed capacity

ITEM NO.	DESCRIPTION	PRICE
FDTMCSP-H	Turbomate High Chick Start Pan	5.94

BACKYARD POULTRY & FARM SUPPLIES

Rubber Feed Pan

100% reinforced rubber composition makes these products extremely resistant to cold weather cracking. Multiple feeding of animals, salt and mineral feeders, ceramic tile soaking, and other farming and industrial chores.

Sorting Panel

This durable 30" x 36" Swine Two-Way Solid Sorting Panel comes in handy for guiding swine in and out of stalls and crates. Features one-piece molded construction with no seams to protect the panel from bacteria. Includes rounded hand grips on the top and sides for easy handling. Lightweight, this 11-lb. panel may be easily manipulated by one person.

ADVANTAGES

- Made of high-density polyethylene
- Durable and lightweight for easy handling
- 1½" flared edges on perimeter of sorting panel prevent sorting panels from falling into the pit
- Comfortable, rounded handle hole grips on the top & side allow for easy handling with better control
- Smooth surface is easy to clean and disinfect. Won't dent like aluminum.
- Designed to address biosecurity issues while moving or sorting pigs with ease. Helps protect farm workers & hogs.
- Manufactured as 1-piece solid molded construction with no seams to split open or harbor disease

Green Rubber Boots

FEATURES

- 100% waterproof
- TDT (triple density technology) uses proprietary compound formulations for increased resistance to degradation from many harsh chemicals
- Outsole perimeter is formulated for tough, long-wearing support
- Center sole is dual compounded for cushioning, long wear and traction on slick surfaces
- Compounded for long wear and slip resistance
- Foot form contour insole provides additional comfort
- Reinforced construction at critical stress points provides extended durability
- Higher, wider, kick-off lugs offer easy on/off convenience

MTLA050	½ HP Leeson Auger Motor	163.52
MTLA075	¾ HP Leeson Auger Motor	200.47
MTLA100	1 HP Leeson Auger Motor	204.93

Heavy-Duty Single Phase Hi-Torque Motors are designed specifically for severe "Farm Duty" applications.

The motors have double sealed ball bearings prelubricated with Exxon POLYREX® EM Grease which has an operating temperature range of -20° F to +350° F and a special formulation to provide extra bearing protection. These Lesson® Motors are single Phase, 60 Hertz.

ADDITIONAL FEATURES/ADVANTAGES

- Gasketed Capacitor Housing and Conduit Boxes
- Copper Windings and Varnish
- Manual Overload Protection
- Totally Enclosed Fan Cooled
- Double Shielded Ball Bearings
- Rubber Boot Over Manual Reset for Weather Protection
- Capacitor Start
- Service Factor 1.15
- High Starting Torque
- 1725 RPM
